SUMMARY

I am a results-driven **Full-Stack Developer** with **2 years of experience** in crafting secure, scalable web applications using **Laravel, PHP, React, and MySQL**. Expertise in **RESTful API design, Role-Based Access Control**, and **Payment Integration**. Passionate about writing clean, maintainable code and continuously striving to deliver **production-ready software solutions**.

TECHNICAL SKILLS

Frontend : React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap 5, Axios, React Router
Backend : PHP (OOP), **Laravel**, MVC Architecture, RESTful APIs, JWT/Sanctum Auth
Database : MySQL, Relational Database Design, Query Optimization, Database Migrations
Deployment: **Project Deployment**, cPanel Hosting, Shared Hosting, Environment Setup
Tools : Git, GitHub, Postman, Composer, NPM, Vite, VScode
Soft Skills : Problem Solving, Team Collaboration, Analytical Thinking, Adaptability
Concepts : SOLID Principles, Clean Code, CRUD, Responsive UI, Web Security Basics

EXPERIENCE

•Full-Stack Web Developer | *Contract & Freelance*

BikriZone — E-Commerce Platform

2025 – 2026

- Solely designed and delivered a production-grade full-stack e-commerce platform to LogicThree software companies, handling everything from database design to deployment. Built a 26-table schema, 75+ REST API endpoints, bKash payment integration, real-time chat via WebSockets, multi-auth (JWT, OAuth, OTP), ERP module, and a 4-role RBAC system.

•Full-Stack Web Developer | *University Final Project*

Online Traffic Offense Management System (OTMS)

2024

- Designed and built a complete traffic violation management system for police departments as my university final year project, replacing manual paperwork with a role-based digital workflow covering offense recording, fine management, vehicle verification, and admin reporting.

PROJECTS

•BikriZone — Production-Grade E-Commerce Platform

🔗 Source | 🌐 Live

- Solely designed and delivered a **full-stack e-commerce platform** from scratch to **3 software companies**, featuring a **26-table relational schema** and **75+ RESTful API endpoints**.
- Integrated **bKash Tokenized Payment API** (3-step flow), **real-time customer support chat** via Laravel Reverb (WebSockets), and a **multi-auth system** (JWT, Google/Facebook OAuth, OTP).
- Built an **ERP module** (supplier management, purchase orders, inventory tracking) and an **RBAC system** with 4 roles enforced at API middleware and frontend level.
- **Tech**: Laravel 12, React 19, MySQL, WebSockets (Reverb + Pusher.js), Sanctum, Socialite, Zustand, Bootstrap 5

•Online Traffic Offense Management System

🔗 Source | 🌐 Live

- Engineered a **full-stack, role-based web platform** for traffic law enforcement — enabling officers to **log violations**, perform **real-time vehicle verification**, and manage **end-to-end fine processing**.
- Designed a **multi-role access control system** (Admin, Officer, Driver) with secure authentication and permission-based dashboards.
- Integrated an **online payment module** supporting fine settlement with **transaction tracking** and automated **digital receipt generation**.
- **Tech**: Laravel, PHP, MySQL, Bootstrap, JavaScript

•WeatherNow — Real-time Weather Dashboard

🔗 Source | 🌐 Live

- Created a responsive dashboard fetching real-time weather data and 5-day forecasts via public REST APIs with asynchronous JavaScript.
- **Tech**: JavaScript (ES6+), OpenWeather API, CSS3

EDUCATION

•Premier University, Chittagong

Bachelor of Science in Computer Science and Engineering

2021 – 2025

Bangladesh

LANGUAGES

Bengali **English**
